Datos Health is growing and looking to add a senior Java developer lead!

We are looking for an experienced developer to join our amazing Professional Services Team. Join us and take part in one of the world's leading health care products during these challenging times.

About Datos:

Datos is a fully automated Remote Care platform designed to directly connect patients with medical sources of care from the comfort of their own homes, for improved quality of life. The platform makes it possible to safely monitor, detect, analyze and predict adverse events or other changes in patient conditions – enabling care teams to communicate and intervene in real-time and to successfully manage even the most complex medical treatment protocols.

A full-stack software platform that seamlessly merges with existing operational workflows to equip care teams with the tools required to remotely manage complex clinical protocols and automates provision of personalized remote care – all at a fraction of the cost of alternative offerings.

Datos is ideally positioned to deliver a uniquely comprehensive solution capable of gearing pharmaceutical companies, providers and patients with everything they need to take remote healthcare to the next level.

Responsibilities:

- Be a tech lead, mentor and take part in developing our infrastructure and architecture.
- Take a major part in creating customer solutions,architecture and development of various integration services.
- Work closely with Healthcare organizations, implementing and delivering projects that enables them to use our industry changing product.
- Be the face of the company for customers.
- Design, Develop and integrate quality code for our professional services team.

Requirements
- 5 years in developing complex software solutions
- 3+ years writing code in the Java ecosystem
- Broad understanding and knowledge of various cloud architectures
- Ability to self-learn new technologies
- **Advantage** - experience with Spring Boot
- **Advantage** - experience with various cloud provides (Azure, AWS, GCP)
