**Datos Health is growing and looking to add a Senior Java developer to our team!**

**We are looking for an experienced developer to join our amazing Professional Services Team.**

**About Datos Health:**

Datos Health offers a fully automated Remote Care platform designed to directly connect patients with medical sources of care from the comfort of their own homes, for improved quality of life. The platform makes it possible to safely monitor, detect, analyze and predict adverse events or other changes in patient conditions – enabling care teams to communicate and intervene in real-time and to successfully manage even the most complex medical treatment protocols.

Our full-stack remote patient monitoring solution is both device-agnostic and disease-agnostic and seamlessly equips care teams with the data and tools required to manage even their most complex and chronically ill patients.

**Responsibilities:**

- Be a tech lead, mentor and take part in developing our infrastructure and architecture
- Take a major part in creating customer solutions, architecture and development of various integration services
- Work closely with healthcare organizations, implementing and delivering projects that enables them to use our innovative product
- Comfortable in a customer facing role
- Design, Develop and integrate quality code for our professional services team

**Requirements:**

- 5 years in developing complex software solutions
- 3+ years writing code in the Java ecosystem
- Broad understanding and knowledge of various cloud architectures
- Ability to self-learn new technologies

**Preferred Qualifications:**

- Experience with Spring Boot
- Experience with various cloud providers (Azure, AWS, GCP)
