

Location: Tel-Aviv, Israel

Datos Health is growing and looking to add a Product Design (UX/UI) Lead to our team!

About Datos Health:

Datos Health offers a fully automated remote care platform designed to directly connect patients with medical sources of care from the comfort of their own homes, for improved quality of life. The platform makes it possible to safely monitor, detect, analyze and predict adverse events or other changes in patient conditions – enabling care teams to communicate and intervene in real-time and to successfully manage even the most complex medical treatment protocols.

Our full-stack remote patient monitoring solution is both device-agnostic and disease-agnostic and seamlessly equips care teams with the data and tools required to manage even their most complex and chronically ill patients.

What we are looking for

We are looking for a highly talented and experienced product designer who loves learning about new technologies and exploring their healthcare aptitude. To be successful in this role, you should be able to identify user needs and work cross-functionally to design the user experience as well as the user interface. Ultimately, you will lead our user experience end to end and help us roll out products that deliver our company's vision.

Responsibilities:

- Conduct a full cycle of product design processes from user research, ideation, concept, wire frames, visual design
- Build and maintain a design system to allow efficiency and alignment
- Work in collaboration with product management, customer success and development teams
- Provide a creative and innovative UX and UI design for multiple platforms (mobile and web), while considering both business and user needs
- Manage tasks across multiple projects, work alongside additional designers and ensure high-quality execution of all deliverables

Qualifications:

- 4+ years of demonstrated experience with end-to-end (UX and UI) product design in a product company
- Cross-platform (iOS, Android, Web) & complex systems interface design experience
- Experience with design and prototyping tools
- Team player who knows how to collaborate and brainstorm
- Comfortable working independently
- Strong analytical and problem-solving, planning and execution skills
- Excellent communication and interpersonal skills
- Passion and curiosity to learn and adapt in a dynamic startup environment
- Highly proficient in spoken and written English

Preferred Qualifications:

- Bachelor of Design in Visual Communication or Interactive Design
- Previous experience within a healthcare organization

Portfolio + CV is required.

To apply for this opportunity, please send your CV and a cover letter to careers@datos-health.com. The subject line should include the job title and your name.
